

## WHY AUTHENTIC PARTS MATTER

'Look-alike' implant and abutment systems attempt to copy the original manufacturer's design, but cannot give assurance of equal precision or material quality. Compromises, such as a poor connection between the implant and abutment, can lead to complications. That's why practitioners request only genuine Straumann components.

When you examine a genuine Straumann Bone Level implant-abutment with CrossFit® connection, it's clear to see why it's so important for you and your patients to insist on the genuine Straumann components.

- 1 AVOID PEAK STRESSES**  
Conical screw head
- 2 SEALED CONNECTION**  
Conical implant-abutment interface
- 3 PRECISE GUIDANCE AT ASSEMBLY**  
Radial contact surfaces
- 4 HIGH STABILITY**  
Deep implant-abutment engagement

## AVOID PEAK STRESSES

Conical screw head is designed to offer the following benefits:

- High resistance to lateral forces
- Even load distribution
- Distribution of anti-rotational and bending forces
- Even stress distribution to avoid peak stresses
- Minimize loosening or breakage of the screw

## SEALED CONNECTION

Conical implant-abutment interface is designed to offer the following benefits:

- Support mechanical stability of system to lateral forces
- Helps ensure proper seating of the abutment
- A seal against bacterial contamination, minimizing the microgap
- Reduced risk of micromovements

## PRECISE GUIDANCE AT ASSEMBLY

Precise guidance at assembly is designed to offer the following benefits:

- Assembly only possible in its correct orientation
- Radial contact surfaces
- Tactile feedback when fully assembled
- Compensates for low visibility

## HIGH STABILITY

CrossFit® Connection is designed to offer the following benefits:

- High stability
- Deep implant-abutment engagement
- All parts function together as intended
- Harmonized dimensional tolerances
- High-quality materials compatible with each other (screw, implant, abutment) to avoid contact corrosion
- Straumann® guarantees the composition of their materials - Straumann cannot guarantee the materials used by other manufacturers
